

Dr. Joseph M. Czerniecki, MD, is the Associate Director of the Veterans Administration, Research Center of Excellence in Limb Loss Prevention and Prosthetic Engineering, and a Professor of Rehabilitation, at the University of Washington, Department of Rehabilitation Medicine. In addition to his research and academic roles he has been the Past National Director of the Veterans Administration Amputation System of Care.

He completed his Medical School education at the University of British Columbia in Vancouver, Canada, and completed his residency training in Physical Medicine and Rehabilitation at the University of Washington in Seattle. His primary research interests have been in the area of the biomechanics of amputee gait, the intersection of biomechanics and metabolic costs of ambulation, and how innovations in prosthetic componentry affect gait. Recently his research funding has focused on the biopsychosocial aspects of amputee rehabilitation. In particular the prediction of mobility outcome after dysvascular lower extremity amputation.

Because of his clinical expertise and research background he has been invited to be a Visiting Professor in Geneva Switzerland. He has also been invited both nationally and internationally to present on many different facets of amputee rehabilitation.
